05/05/08

As trusted friends and advisors, I have found the advice and recommendations of the Daley Group to be beneficial to my companies and myself. I met Mr. Daley and Mr. Leath during a networking event a few years ago and have looked to them for advice ever since. I have found their advice to be right on target due to their vast knowledge of business, and the dynamic business environment that is ever changing.

I am the owner of six different small businesses, which can make life tedious day to day. The one thing as a business owner that is hard to see is efficiency issues in your day to day operations. Through my relationship with the Daley Group, I have seen an improvement in efficiencies which has added revenue to the bottom line.

I am thankful to have consultants that I can honestly call my friends. In this fast paced day and age that we live in it is hard to take the time to analyze the big picture. I would recommend them to anyone who is looking to become more efficient and effective at seeing the big picture and running their business.

Thank You,

A handwritten signature in blue ink that reads 'Chris Schmitt'.
